

"Cars"

VS.

"Carts"

Welcome to the wonderful world of vintage golf cars!

I say "golf cars" rather than "golf carts" as the definition of "car" implies some sort of locomotion for golfer and clubs while a "cart" implies something that is pulled or pushed. In reality though, modern usage has blurred the distinction and all of us use the two interchangeably.

In this book you will find a myriad of devices and inventions that have become golf cars - everything from golf cars where you stand, where you sit, from one man cars to 5 person (4 golfers and a caddie/driver) cars - from 2 wheel, 3 wheel, 4 wheel cars and even foldable golf cars that fit in your car trunk!

I've included more photos than text (after all a picture says 1000 words!) and most of us are "visual" learners. Text on the pages typically includes a summary of the interesting features of the particular car or perhaps some interesting story behind its use or development.

So, sit back, turn the pages and enjoy a trip down golf car memory lane!
